Hi Chris,

I can confirm that batteries are included in items listed in the PWP unless otherwise stated. With particular reference to laptops, please refer to line 152 of the PWP (Cat 3 - IT & Telecommunications; Laptop (no battery)) which specifies that the average weight of the laptop does not include the battery.

Apologies for the delay in getting this response back to you, Craig, Lesley and myself have been travelling extensively over the last couple of weeks for our regional roadshows and other meetings.

Kind Regards,

Claire Charras
